Education

Florida State University Graduation: Spring 2027
B.S. Computer Science *Tallahassee, FL*

- Relevant Coursework: Software Engineering, Operating Systems, Theory and Structure of Databases, Data Structures and Algorithms, Programming Languages, Full-Application Development in C#, Computer Organization
- Awards: Florida Medallion Scholar

Skills

Languages: Python, Java, C#, C++, SQL, JavaScript, HTML, CSS
Frameworks & Libraries: .NET MAUI, ASP.NET Core, TensorFlow, Keras, NumPy, Pandas
Platforms & Tools: REST APIs, OpenAI API (GPT Actions), Revit API, SQLite, Git, Confluence, Smartsheet, Linux/Unix
Professional: Project Planning, Stakeholder Engagement, Agile Methodologies, Technical Writing, Data Analysis

Professional Experience

Raymond James June 2026 – August 2026
IT Project Management Intern, AI Execution Team *St. Petersburg, FL*

- Found that AI/ML process documentation was written for engineers, not the business partners and IT teams who needed it; rebuilt it as a Confluence knowledge base with a six-section architecture, now used by 10+ teams.
- Interviewed 12 stakeholders across development, data science, and leadership after assessing 60+ enterprise resources.
- Presented at the Consumer Forum to 90 attendees, then transitioned the knowledge base to a permanent owner with maintenance documentation.

Burns & McDonnell June 2024 – August 2024
Software Development Intern, Transmission & Distribution *Houston, TX*

- Independently built an AI tool that converted 150+ engineering formulas from 20 Excel spreadsheets into reusable Python functions that run outside Excel.
- Containerized the functions as a REST API connected to a custom GPT through GPT Actions, letting 10 engineers run spreadsheet analyses through natural-language prompts and saving about 30 minutes per analysis.
- Developed a Python Revit plugin that automated 3D modeling of shallow pad and drilled pier foundations, cutting configuration time from 20 to 5 minutes.

Verizon Innovative Learning May 2024 – July 2024
Coding Mentor *Tallahassee, FL*

- Led weekly coding sessions for 30+ students in Python, Scratch, and CoSpaces, guiding a smart-city simulation build.
- Took students with no prior programming experience to a completed group build over the course of the program.

Projects

Hospital Portal | *C#, .NET MAUI, ASP.NET Core, SQLite* (GitHub)

- Built a cross-platform patient and appointment manager in .NET MAUI using MVVM, with SQLite persistence across patients, physicians, and appointments.
- Implemented a scheduling service enforcing business hours and rejecting physician and room double-bookings.
- Developed a companion ASP.NET Core REST API with full CRUD and search endpoints, consumed by the client over HTTP.

Handwritten Digit Classifier | *TensorFlow, Keras* (GitHub)

- Trained a CNN with dropout and per-epoch augmentation ($\pm 10°$ rotation, shift, zoom) to 99.05% test accuracy on MNIST.

Traffic Incident Analysis Pipeline | *Python, Pandas, Matplotlib* (GitHub)

- Built a pipeline analyzing FDOT crash data across fatalities and serious injuries by district, surfacing monthly and regional patterns.

Leadership Experience

National Society of Black Engineers August 2026 – Present
Senator *FAMU-FSU College of Engineering*

- Co-authored the chapter's conference eligibility policy, defining participation and good-standing requirements for members attending the NSBE Fall Regional Conference.
- Planning travel and lodging for 64 chapter members attending the conference in Atlanta.

Kappa Alpha Psi Fraternity, Inc., Theta Eta Chapter September 2026 – Present
Interim Vice Polemarch *Florida State University*

- Oversee the chapter's 6 committees; organized Touchdowns for St. Jude (25 campus organizations, $375 raised) and Achievement at the Polls, which brought local city officials to campus to discuss voting with students.
- Led Service to Stroll, a chapter initiative requiring community service before members could attend social events, reaching 197.5 service hours as a chapter.
