EDUCATION

Florida State University

Graduation: Spring 2027

B.S. Computer Science

- **Relevant Coursework:** Theory and Structure of Databases, Software Engineering Capstone, Data Structures II
- **Awards & Acknowledgments:** Florida Medallion Scholar

Tallahassee State College

Graduation: Summer 2024

A.A. Computer Science

- **Relevant Coursework:** Python Programming, Calculus II
- **Awards & Acknowledgments:** GM STEM Scholar, Honors College

SKILLS

- **Programming Languages:** Python, Java, C++, SQL, JavaScript, HTML, CSS
- **Frameworks & Libraries:** TensorFlow, Keras, Scikit-Learn, NumPy, Pandas
- **Platforms & Tools:** Smartsheet, Office Suite, Git, Terminal, Linux/Unix
- **Professional:** Project Planning, Stakeholder Engagement, Agile Methodologies, Technical Writing, Data Analysis

PROFESSIONAL EXPERIENCE

Raymond James

June 2026 – August 2026

IT Project Management Intern — AI Execution Team

St. Petersburg, FL

- Led a knowledge-hub consumer-experience refresh, improving how users discover and access enterprise AI resources.
- Interviewed AI engineers, data scientists, product managers, and architects to surface improvement opportunities.
- Assessed documentation across enterprise AI initiatives to identify gaps and usability improvements.
- Built a phased Smartsheet plan and iterated wiki concepts from stakeholder feedback through final delivery.

Burns & McDonnell

June 2024 – August 2024

Information Technology Intern

Houston, TX

- Led the transformation and revamp of the IT stockroom, resulting in enhanced support for 850+ users.
- Provided help-desk support that improved employee productivity across Microsoft and Apple products.
- Collaborated with Lenovo vendors, resolving issues for 1,000+ monitors, improving hardware reliability.
- Troubleshoot and repaired 45 AV devices, optimizing broadcast efficiency and reducing downtime.

Verizon

May 2024 – July 2024

Coding Mentor

Hybrid – Tallahassee, FL

- Led weekly coding sessions for 30+ students, teaching Python, Scratch, and CoSpaces.
- Boosted project completion and engagement rates by over 40%.
- Guided students in building a smart-city simulation using Python and CoSpaces.
- Balanced hybrid instruction while managing a concurrent full-time internship.

PROJECTS

Handwritten Digit Classifier (*GitHub*)

- Developed a Convolutional Neural Network (CNN) to classify handwritten digits from the MNIST dataset, achieving 99% accuracy with TensorFlow and Keras.
- Applied data augmentation to reduce overfitting and improve model robustness.

Traffic Incident Analysis Pipeline (*GitHub*)

- Built a Python data-analysis pipeline (Pandas, Matplotlib) to identify trends in FDOT crash data across fatalities, crashes, and serious injuries by district.
- Generated insights on monthly and regional patterns to help explain factors influencing crash outcomes.

LEADERSHIP EXPERIENCE

Kappa Alpha Psi Fraternity, Inc. — Theta Eta Chapter

March 2025 – Present

Historian

Florida State University

- Grew chapter digital presence across 3+ platforms to 375K+ monthly page views, an 875% increase in engagement.
- Digitized 200+ photos, videos, and milestones into a cloud-based archive that streamlined preservation.
